

AWEX-G Forecast for Saturday, Nov. 8 (Nov 9 UT)

Forecast (updated 6:35pm CST): Looks to be a cloudy night. Very low bases with possibility of some drizzle. Winds easterly and light. **Moisture gradient across area could possibly shift west, but not much happening dynamically to change the current situation other than weak lift only sufficient for light precipitation.**

Synopsis: 00Z surface analysis: Stationary front out to the west in N.Mexico and Colorado. Broad high pressure region, centered to the NE.

OK mesonet: Calm to light winds from the NE/East. Temps in the mid- to high-40s with low dewpoint spreads. Drier air just to the north and east.

Grant County forecast: Tonight. Cloudy with a 20 percent chance of light rain or drizzle. Lows in the upper 30s. East winds around 10 mph in the evening becoming light.

RUC cloud forecast: Low clouds all night.

Observations at SGP@00 Z: Cold and Cloudy.

Decisions made at the 7pm AWEX-G meeting:

1) Cloudy! Decided to call it a No-Go night.

What actually occurred?

1) No-GO

Lidars

No SRL data tonight.

CARL ran throughout.
